Art Unit: 2876

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Kuramochi 6,634,564. Kuramochi discloses as seen in figure 3 and described in column 8 line 38 – column 9 line 28, a substrate 120 to which an antenna coil 160 is attached. Also attached is a chip 110 and external pads 131,132. The coil 160 is attached to the chip by leads 141,142. The external pads 131,132 are attached to the chip by leads 145,146 that pass through holes 125 in the base 120. The entire assembly, except the external pads 131,132, is then sheathed in a resin to form the card.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kashima 2002/0170974, Emori et al 6,378,774, Yoshigi et al 6,637,664, Ikefuji et al 6,601,770 and Kaiya et al 6,460,773 all disclose contact/noncontact card assemblies.
